PROFESSIONAL SUMMARY

Full Stack Web Developer with professional experience developing React-based web applications, automating business workflows, and building internal tools that improve administrative efficiency. Experienced in React, TypeScript, JavaScript, REST API integration, PostgreSQL, Supabase, responsive UI development, Git-based workflows, debugging, and testing.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3 | **Backend & Database:** REST API Integration, PostgreSQL, Supabase, MySQL, Firebase

Other Languages & Mobile: Flutter, Kotlin | **Tools & Workflow:** Git, GitHub, Codex, Freebuff

PROFESSIONAL EXPERIENCE

TESDA — Davao del Norte Provincial Office

Technical Support Staff / Full Stack Web Developer - Contract of Service | Davao del Norte, Philippines | March 2026 – September 2026

- Develop and maintain full-stack web applications that automate document generation, file processing, printing, and administrative workflows.
- Build responsive interfaces using **React, TypeScript, JavaScript, HTML, and CSS**.
- Integrate backend services and databases using **REST APIs, PostgreSQL, and Supabase**.
- Translate business and administrative requirements into functional web application features in coordination with office personnel.
- Implement automated document-generation and email-notification workflows for Training Centers and Assessment Centers.
- Perform testing, debugging, troubleshooting, and continuous improvements across frontend and backend components.
- Use **Git, GitHub, Codex, and Freebuff** within development and application-maintenance workflows.

AIMHI

Front-End Developer Intern | Tagum City, Davao del Norte | April 2025 – July 2025

- Developed responsive React components based on Adobe XD designs and frontend requirements.
- Collaborated through Git-based version control and feature deployment workflows.
- Tested and validated features before production release and resolved UI issues.

PROJECTS

TDIP — TESDA Davao del Norte Integrated Portal | React — Developed an internal portal for document/file generation, printing workflows, and automated email notifications.

NotiFire — IoT Fire Detection System | ESP32, Firebase, Flutter — Developed an IoT fire detection system connecting ESP32 to Firebase Realtime Database with real-time Firebase Cloud Messaging alerts.

UMTC Research Title Portal | PHP, MySQL, HTML, CSS — Built a database-driven CRUD application for university research titles with PHP/MySQL backend functionality and responsive UI.

eType — Android Typing Game | Kotlin — Developed an Android typing application with real-time WPM calculation, scoring, input validation, and performance tracking.

EDUCATION

University of Mindanao Tagum Campus — Bachelor of Science in Information Technology | 2021 – 2025
